## MOTIVATIONLETTER

---

Sitko Patryk

[patryk.sitko.algemeen@gmail.com](mailto:patryk.sitko.algemeen@gmail.com)

Subject: vacancy, Junior full-stack developer

Dear,

I would like to apply for this **exciting** and challenging position and in this short will I explain my **motivation**.

I have followed multiple **Developer trainings** at Intec Brussels. During those trainings I knew that a career as a developer was a perfect fit for me. For the time being, I am actively looking for opportunities to test and expand my knowledge in the domain of browser based and standalone application development. In order to further **develop my skillset** and to be able to realize more assignments on an professional level, am I looking for a workplace where I can further polish myself as a full-fledged developer. My skills and **your company** seems to be the **right fit**.

As a full-stack developer **I'm responsible** for the **implementation of designs** of end-user interfaces and experiences provided by the respective experts. This way can I can write the right functions and methods drafted from the proposals for the realization of **functionality** that meets the wishes, demands and **needs** of the **end users**.

I have extensive **knowledge and experiences** with different build automation tools like **Yarn**, **NPM** and **maven**. **JavaScript/ECMAScript and Java** have also no more secrets to me. Creating **single page applications** was always my main focus. Therefore the technology called JSP isn't that familiar to me.

I am a **social** person with a great **sense of responsibility**. I'm someone that **stands firmly** in my shoes. I know that I 'm excellently **capable** of handling myself in stressful situations. I would like to **work together** in a **team** where I can **learn** from colleagues and them from me; whenever possible of course. Working lonely isn't an issue neither.

Hopefully you've made an idea around my proposed skillset and personality after reading this letter. I would like to **express** my **motivation and enthusiasm** in an introductory meeting if that's what you're also seeking.

Kind regards

Sitko Patryk
